Wisdom Audio Features New Additions to Acclaimed Sage Series at 2010 EH Expo

Wisdom Audio Personnel will be on Hand to Discuss the New Sage Series SCS "Suitcase" Sub and SE Architectural Speaker Installation Solution, as well as the Acclaimed L75i and P20 Speakers and Accompanying Electronics

CARSON CITY, Nev., March 5, 2010 — Wisdom Audio (www.wisdomaudio.com), the leader in planar magnetic technologies, is proud to announce it will feature the acclaimed and award-winning Sage Series speaker systems at the 2010 Electronic House Expo (EHX), held from March 25-27 at the Orange County Convention Center (Orlando, Fla.), booth #827.

Wisdom Audio personnel will be on hand to discuss existing and new Sage Series products, including the new SCS "suitcase" sub (scheduled to ship this month) and the new SE architectural speaker mounting solution for installation within concrete and masonry walls. Wisdom's L75i and P20 speakers, as well as accompanying electronics and other Sage Series products, will also be showcased during the show.

"After tremendously successful CES and ISE shows the past two months, we are excited to showcase our new and expanded existing product lines to the EH Expo attendees," said Mark Glazier, Wisdom Audio president. "The Florida and southeast territories are very important markets, and so helping educate top custom electronics integrators on the Sage Series' diverse product line and applications, including in high-end marine installations, is a top priority for Wisdom."

The SE architectural speaker mounting solution is designed for Sage Series installations within concrete and masonry walls. Featuring an innovative flexible stainless steel grill that floats above what could be an uneven masonry wall surface, the SE enclosure is Wisdom's most aesthetically pleasing and best performing in-wall mounting enclosure.

(more)

The 400-watt SCS “suitcase” sub’s uncommon size (with a size of 37in. x 22in. x 7in.) and aspect ratio allows it to be placed in areas where other subwoofers will not fit, offering installers a unique option. The SCS Regenerative Transmission Line™ woofer alignment is capable of SPLs in excess of 120 dB @ 25 Hz. The dual 5in. x 7.5in. woofer design yields an equivalent active cone area of 13 inches.

Wisdom Audio has brought to market more than 20 Sage Series models, encompassing in-wall, on-wall, and freestanding versions of most configurations ranging from 20 inches to 76 inches tall. Sage Series speakers incorporate new generation proprietary thin film planar magnetic drivers which allow for its narrow and shallow physical characteristics, thus permitting the unprecedented possibility of the same driver complement and back box to be used for such varied applications, ranging from in-wall to freestanding.

About Wisdom Audio

Wisdom Audio is the leader in designing and manufacturing high-performance planar-magnetic transducers with more than 90 man-years experience. Wisdom Audio was founded in 1996 to create no-compromise planar loudspeaker systems for the most demanding and critical audiophiles. Wisdom Audio systems employ proprietary, custom-made planar magnetic and dynamic transducers optimized for high-performance, high-end architectural audio reproduction applications. Its hybrid-technology systems have earned praise and awards from the specialized media, while satisfying a growing base of customers and dealers worldwide.

Wisdom Audio’s multi-award winning Sage Series architectural products are handcrafted in limited quantities by specialized craftsmen at its headquarters in Carson City, Nevada.
