# SAGE SUPERBARS

C20m x2 | C20m x3 | C20m x2, C38m x1 | C38m x2

For the ultimate in sound reproduction, fit-and-finish, and quality craftsmanship there is only one choice. Welcome to the Sage Series Superbars. Sage Series Superbars are available in custom lengths of up to 98", and custom colors if the standard finishes are not suitable for your environment and decor. All must be used in conjunction with active crossovers, and bi-amplification (The SC-1 and/or a variety of surround processors and amplifiers with ample DSP and active crossover adjustment may be used, please call for more information). Depending on your environment, an additional subwoofer may not be necessary due to the exceptional low frequency response of our Superbars. However, we do offer an excellent selection of RTL subwoofers if the room needs a little extra low frequencies love.
