**FOR IMMEDIATE RELEASE**

**WISDOM AUDIO SAGE SERIES® COMPLETES THE STEWART FILMSCREEN TRAINING FACILITY WITH UNPARALLELED AUDIO QUALITY**

- Wisdom Audio Sage Series high performance architectural loudspeakers selected for inclusion in Stewart Filmscreen’s state-of-the-art training facility including the L150i (L&R), C225i (C), L75m (Backs), STS (two subs), and a SC-1 System Controller
- Completed audio system also includes Lab.gruppen amplifiers, Transparent Audio interconnects and speaker cables, and an Anthem audio/video controller
- Sage Series speakers complement the Stewart mission to match unparalleled picture quality with the highest performance audio levels available, appealing to both audiophiles and videophiles alike

Carson City, NV, August 18, 2011 – Wisdom Audio, the leader of planar magnetic technologies for architectural speaker solutions, announced today that their Sage Series speakers were chosen for inclusion in the Stewart Filmscreen training facility in Torrance, CA, to be demonstrated with Stewart’s Director’s Choice projection screen. Wisdom components include their L150i left and right channel speakers, a C225i center, L75m backs, two STS subwoofers, and a SC-1 System Controller. To complete the audio experience, the system features 19 channels of Lab.gruppen FP10000Q high efficiency and power density amplification, Transparent Audio Custom Installation interconnects and speaker cables, and Anthem’s D2v Audio/Video controller. Each year, hundreds of dealers and integrators who look to this training facility for the latest in screen technology will now have the opportunity to experience unparalleled audio quality with the incorporation of this groundbreaking audio setup.

## Wisdom Audio Stewart Training Center, continued

Wisdom Audio's award-winning Sage Series raises the bar to an unprecedented level for realized performance from architectural speakers. Life-like dynamics, low distortion, high resolution, three dimensional sound staging and freedom from compression make these speakers the perfect complement to Stewart Filmscreen's state-of-the-art screens. "I listened to the new Wisdom Audio systems earlier this year in their facilities in Carson, NV and was very impressed. While viewing *Avatar*, I heard detail and new sound bits that had not registered in previous viewings," stated Grant Stewart, Stewart Filmscreen CEO.

With Stewart Filmscreen's unmatched quality in projection screen design, it is no surprise that Wisdom Audio's loudspeakers were used to complement their extraordinary display. The versatile Sage Series speakers offer a sophisticated, understated elegance that can either complement or virtually disappear from the room as needed. This approach, when combined with awe-inspiring sound quality made this brand a clear choice in creating the optimum home theater demonstration venue. As picture and sound are intimately linked, each reinforces the other in conveying the essence of a filmmaker's vision or the emotional impact of a musical performance. The addition of the Sage Series speakers completes the experience and appeals to audiophiles and videophiles alike.

"Our goal in planning the audio system for the Stewart Training Center was to match the impact of their Director's Choice video perfection with state-of-the-art audio resolution and dynamics," states Todd Sutherland, Wisdom Audio VP Marketing. "Stewart has given us the opportunity to demonstrate that no compromise audio can be achieved behind a perforated screen in a home cinema, *with in-walls*. Dealers are encouraged to bring their best clients into this facility, demonstrate the perfect marriage of audiophile-like resolution and horn-like movie dynamics and to open them to possibilities our collective solutions provide. We know anyone leaving this theater will second guess their own systems and be left asking how they might achieve this experience in their own home."

"As MK Marketing represents both Stewart Filmscreen and Wisdom Audio in our territory, the MK team has the opportunity to wow the best dealers in our region with this Director's Choice and Wisdom Audio system," stated Mike Kavanaugh of MK Marketing. "It's so much fun to watch and the reactions are always the same, [I'm blown away by the performance of this system! I simply can't believe that I'm listening to in-walls with those incredible dynamics and SPLs. I have clients who need to hear (and see) this system.]"

Featuring Wisdom's proprietary wideband planar magnetic line source technologies, the Sage Series has found its niche among the greatest audio and video displays in production. A complete experience, Stewart Filmscreen's new training facility flawlessly combines these reference elements to give dealers and integrators a holistic vision of what is possible in the realm of home theater. Backed by exemplary sound quality and extraordinary design, the Sage Series loudspeakers are the ideal addition to any home theater or audio environment.

### **About Wisdom Audio**

Wisdom Audio is the leader in designing and manufacturing high-performance planar magnetic transducers for architectural speaker applications with more than 100 man-years experience. Wisdom Audio was founded in 1996 to create no-compromise planar loudspeaker systems for the most demanding and critical audiophiles. Wisdom Audio systems employ proprietary, custom-made planar magnetic and dynamic transducers optimized for high performance, high-end architectural audio reproduction applications.

Its hybrid-technology systems have earned praise and awards from the specialized media, while satisfying a growing base of customers and dealers worldwide. Wisdom Audio's multi-award winning Sage Series architectural products are handcrafted in limited quantities by specialized craftsman at its headquarters in Carson City, Nevada.
